OUR COMPREHENSIVE  
SOLUTIONS

Midsomer

Solartech

# *Welcome* To Midsomer Solartech

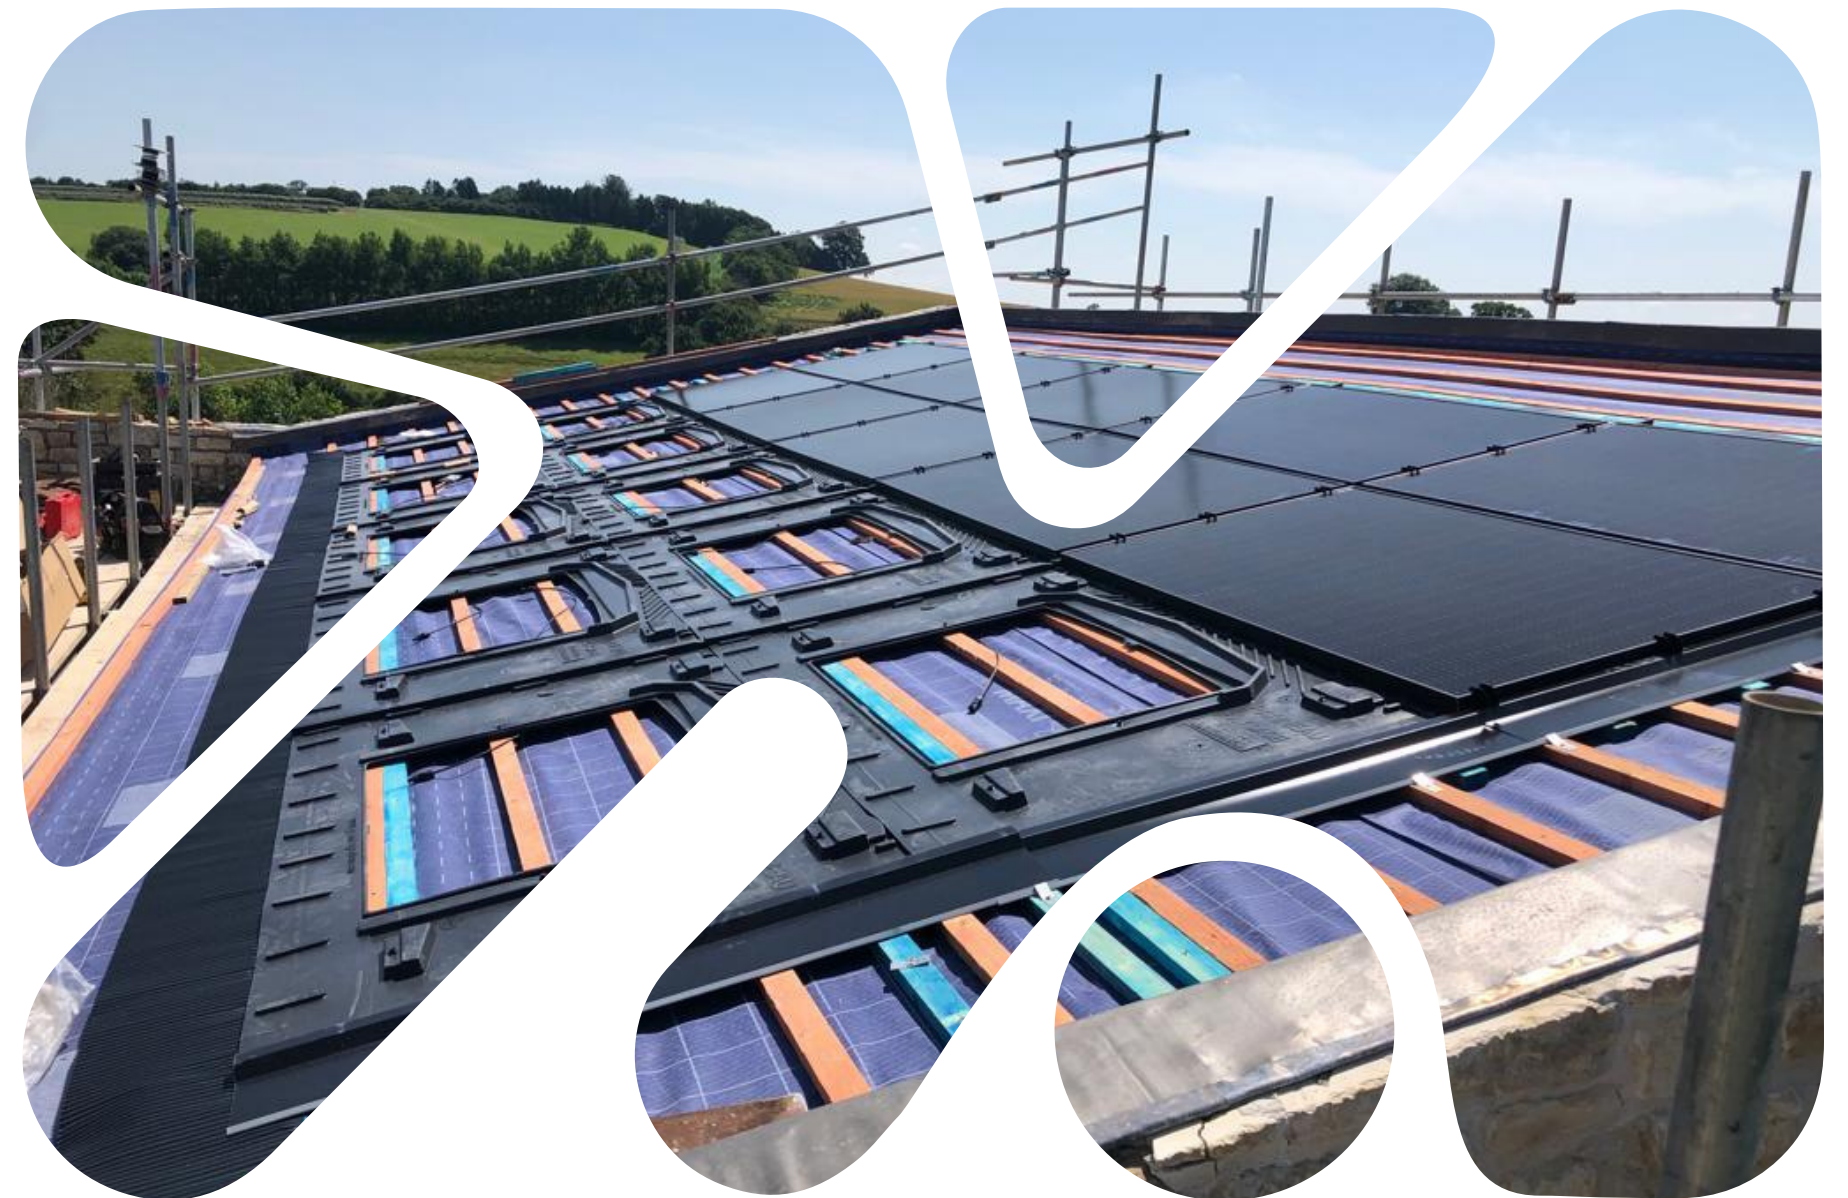

At Midsomer Solartech, we don't just offer energy solutions; we're pioneers of a sustainable future. Committed to innovation and excellence, we provide a wide array of services meticulously crafted to cater to the varying needs of businesses and residences throughout the U.K.

# Who We Are

Established in 2011 Midsomer Solartech Ltd takes pride in our decade-long commitment to delivering cutting-edge solar PV systems for both domestic and commercial properties. We champion sustainability by enabling the generation of clean energy, contributing significantly to reducing carbon footprints.

Midsomer Solartech specialises in various solar PV configurations, such as the design, supply and installation of rooftop and ground mounted solar, solar battery storage and EV charging solutions.

# Solar PV Installations

## → Solar Energy

Elevate your energy solution with integrated rooftop solar PV installations. Using the GSE roof frame and flashing system this installation not only ensures a sleek and appealing finish but also addresses common concerns like wind issues and potential nesting

# Ground Mount Solar Installations

Explore Limitless possibilities with our solar solutions. If your roof isn't the perfect fit or you have ample ground space, our ground mount solar installations are the ideal alternative. Additionally, our expertise extends to flat roof installations, offering flexibility with options like solar console tubs or lightweight frame systems.

# *Certified* Tesla Installer

Midsomer Solartech Ltd is delighted to be Tesla Powerwall certified installers, empowering us to provide advanced battery solutions for your energy needs.

-  Weather Proof
-  House Back-up
-  Affordability
-  System Monitoring

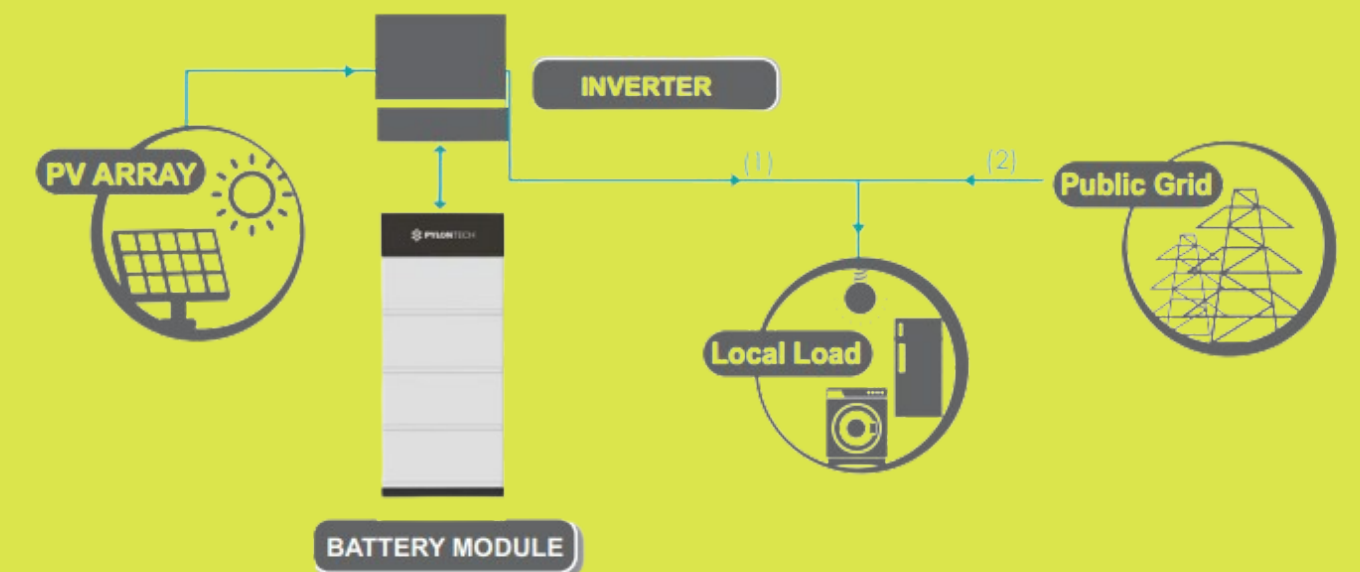

TESLA  
POWERWALL  
CERTIFIED INSTALLER

At Midsomer Solartech Ltd, we specialise in integrating battery storage and EV chargers into your solar PV system. EV owners can enjoy reduced charging costs during off-peak hours, and those with energy storage batteries can now also capitalize on these periods to charge, ensuring readiness for day or peak usage.

# Battery Storage

*Solution of ESS*

---

# *Process* Efficiency

We ensure a seamless process by handling all necessary forms and requests to guarantee a thorough and hassle-free experience for our clients. Included within our comprehensive package are essential services such as

- structural roof surveys
- DNO approval and confirmation
- Notify Building Control

“

The Solartech team were great from the start. After several changes I made to size, capacity and installation method of the system Solartech supported me throughout the whole process. Once Installation was arranged the team arrived on time and completed a quality install, finished off with an informative handover.

I can't thank the team enough. I'm very happy with my new PV array and battery storage system.

”

Chris, homeowner.

“

I wholeheartedly recommend Midsomer Solartech to anyone considering a Solar PV Installation. Their expertise, professionalism and attention to detail throughout the entire process was commendable.

”

Mark, homeowner.
